

Real people. Real engagement. Paid only when it's proven.

Put your likes, follows, comments and clips in front of an active community that is rewarded for doing exactly what you ask — every action reviewed by a human before a cent is paid.

Pay per approved action

HOW IT WORKS

Four steps from idea to results

1

Fund your wallet

Top up your advertiser wallet in crypto through DWallet. Your balance and spend are always visible.

2

We launch your campaign

Your task, your reward per person, your cap on completions, and a timer from 5 minutes to 24 hours.

3

Members submit proof

Community members do the task and send a screenshot or short video with one command.

4

Approved = paid

A reviewer approves each proof. Members are paid instantly; anything unused comes back to you.

100% verified

Every submission is reviewed by a person before payout

Zero waste

You only pay for approved actions — unused budget is refunded

Full spotlight

One campaign runs at a time, so yours has the channel to itself

Built so advertisers stay in control

Everything an advertiser needs to launch, watch and settle a campaign — without chasing anyone for screenshots or payments.

- **Focused Campaigns for your needs, on demand**

Every campaign is built around one clear goal — the likes, follows, comments or clips you need right now. Tell us what you're after straight from your advertiser dashboard: the link, how many you want and when you need it. Our team turns your request into a ready-to-run campaign, with the task, reward and timing tuned for results — anything from a quick 5-minute push to a full 24 hours — and it shows up on your dashboard so you can follow it live. No packages, no contracts, no minimums to guess at.

- **Proof-verified payouts**

Nothing is paid on a promise — only on proof. Every submission is checked by a real person against your exact task before a single reward is released, so low-effort, fake or duplicate attempts never reach your bill. You get genuine people doing genuine work, and quality content you can stand behind.

- **Pay only for what you get**

Your budget is a ceiling, not a bill. You're charged only for the actions that were actually completed and approved. Any campaign funds that go unused are always returned to your wallet automatically when the campaign ends — every time, with nothing to request and nothing held back.

- **Your own advertiser dashboard**

See your balance, what's set aside for live campaigns, what you've spent, completions per campaign, and a full transaction history. Download spreadsheets for performance and cost tracking — completion rates, spend and cost per completion for every campaign — ready for Excel or Google Sheets. Top up or withdraw unused funds any time.

- **Plan ahead with the campaign queue**

Line up campaigns in advance and let them run back to back on their own. Plan tomorrow's needs today — a launch-day push, a weekend stream, a follow-up wave — and know each one will get its own turn in the spotlight without you lifting a finger.

- **Fair-play protection**

One payout per person per campaign, a cooldown between submissions, and a hard cap on completions — so results are genuine and budgets can't be overrun.

- **Instant crypto payouts**

Approved members are paid straight to their DWallet the moment a reviewer approves — no invoices, no waiting, no manual sends.

- **An engaged community behind it**

ACTIVEBOT powers communities with activity rewards, referrals, live games, giveaways and drops — so members are already here, active, and used to earning.

ESTIMATED PRICING

Simple per-action price points

These are our target prices for each type of task. Your final cost can land higher depending on availability and overall performance — we raise the payout on campaigns that aren't filling until the job is completed.

ACTION	TARGET PRICE PER ACTION	PER 100 COMPLETIONS
 Likes Like a post, video or stream	5¢ – 10¢	\$5 – \$10
 Follows Follow your account or channel	5¢ – 25¢	\$5 – \$25
 Comments Leave a genuine comment	20¢ – 40¢	\$20 – \$40
 Clips Create a clip	25¢ – \$1.00	\$25 – \$100

Targeted amounts, not fixed rates. The end price may be higher depending on availability and overall performance — when earlier campaigns have underperformed, we increase the payout until the job is completed. A small platform service fee is added on top of member rewards.

Example: “Like our stream” campaign

Reward per person	\$0.25
Max completions	100 people
Timer	45 minutes
Total to members (100 × \$0.25)	\$25.00
System fee	Set by campaign type

Unused budget

Returned to you

Our promise

- ✓ You only pay for approved actions
- ✓ Budget is locked up front — nobody goes unpaid
- ✓ Unused funds return to your wallet automatically
- ✓ Every proof is checked by a real person
- ✓ Live results and full history in your dashboard

Ready to launch your first campaign?

Tell us what you want liked, followed, commented or clipped — we'll handle the rest.
